EDUCATION

Nanyang Technological University

Bachelor of Environmental Engineering

Singapore

Aug 2021 – May 2025

EXPERIENCE

Singapore–MIT Alliance for Research and Technology

Machine Learning Engineer

Singapore

Apr 2024 – Aug 2024

- Developed a GAN model with a maximum downscaling factor of 64
- Downscaling is a technique to convert images to higher resolution (e.g., converting temperature data from a map of 1x1 km grids to 200x200 m grids, which corresponds to a factor of 5)
- Attained a mean absolute error (MAE) of 0.45°C, overachieving the target of 2°C MAE

Data Analyst

Jan 2024 – Apr 2024

- Conducted large, multi-table data preprocessing, statistical analysis, and data visualization
- Published paper in Urban Climate Journal: Impact of rainfall on air temperature, humidity and thermal comfort in tropical urban parks

Google Summer of Code 2023: http4s Ember WebSocket Client

Student Developer

Remote, Scala Center

May 2023 – Aug 2023

- Developed a full implementation of a WSClient for http4s Ember—one of the most popular Scala web frameworks
- Presented the project at the Northeast Scala Symposium

PROJECTS

NTU MLDA Club Project: Automated Grading System

LLM Team Lead

Sep 2024 - Present

- Utilize OCRs and CV models to detect text work, equations, and graphs from exam submissions
- Utilize VLMs and LLMs to grade students' exams based on a given grading criteria

FYP: Applied ML in Membrane Fouling

Lead Author

Aug 2024 - Present

- Develop ML and DL models to predict flow rate through membrane over time
- Lead author, collaborate with NTU Asst. Professor and MIT PhD Graduate

Personal Portfolio

Personal Website

Oct 2024 - Present

- Built with Front-end React Application

Personal Blog: Analyzing my Spotify Data

Oct 2024

- Conducted data preprocessing on 6 years' worth of my personal Spotify data
- Created 10 visualizations with Plotly Javascript

Visualizing IMDB Series Ratings over time

imdb-tableau

Jul 2024

- Conducted Multi-table Data Preprocessing with Pandas, with largest dataset containing 11 million rows
- Performed Data Modelling to relate data tables and built a Tableau Visualization Dashboard

imdb-react-graphql

2022 - 2023

- A full-end web application built with PostgresQL, Flask, and ReactJS
- Contributed to the GraphQL backend built with Flask and the PostgresQL database
- Developed the Frontend Application with React and Highcharts

Open-source Contribution for bank.green

Volunteer Developer

2023

- Contributed bug fixes and improvements for the bank.green website

Analysis of U.S. COVID-19 Mortality

Team Lead

2022

- Conducted exploratory data analysis and visualization of COVID-19 related deaths
- Built ML models to predict the number of ICU beds and ventilators needed 1 day in advance

SKILLS

Languages: Python, SQL (Postgres), JavaScript, HTML, Scala, Haskell

Frameworks: React, Node.js, Flask, FastAPI

Tools: Tableau, PowerBI, Git, Bash, Linux

Soft skills: Time Management, Communication, Adaptability, Leadership, Technical Writing, Presentation
